Dental Screening and Sealant Program

Free Dental Exams and Sealant Placement

We are offering dental screening and sealants in partnership with the IWS Children's Clinic. **Your Child's School** was chosen to take part in this project, which provides free dental exams and sealant placement.
*Eligible children covered by Medicaid Insurance will also receive dental cleaning and fluoride. * If it has been 6 months or more since last cleaning/fluoride.

You will receive a copy of your child's dental exam after he/she is seen.

If you wish for your child to participate please take a few minutes to read this letter, complete the consent form on the back of this sheet and return it to your child's teacher as soon as possible.

Screening will take place during the **2017-2018** school year. march 8/march 9 2018.

Q & A

Q: **What are dental sealants?**
A: Dental sealants are thin plastic coatings that are put onto the chewing surfaces of the back teeth. Sealants are painted on the top of the back teeth and harden to form a protective shield over the tooth.

Q: **Does it hurt to have sealants put on teeth?**
A: No, getting sealants is painless. Right after placement, normal activities can resume.

Q: **How long will sealants last?**
A: Sealants can last five to ten years if they are done right and teeth are properly cared for after placement.

Q: **How do sealants prevent cavities?**
A: Dental sealants fill the pits and grooves of the teeth. The teeth are easier to keep clean because the food is easier to brush off with your toothbrush.

Q: **Is brushing still important when teeth have sealants on them?**
A: Yes, brush and floss every day!

Please contact Dr. Betsy Samore (708-848-0528) if you have more questions.
