Oak Park Elementary School District 97 Partners with InfoSnap on Implementation of an Online Solution for Student Registration

March 17, 2015, AUSTIN, TX - Oak Park Elementary School District 97 is partnering with InfoSnap on the implementation of a customized online solution that will streamline its student registration process. InfoSnap, the leader in online registration management solutions for k-12 schools, has helped school districts throughout Illinois design and develop similar solutions.

“Our district is located in an incredibly tech savvy and eco-conscious community,” said Chris Jasculca, District 97’s senior director for policy, planning and communication. “By moving to an online registration system, we will be able to maximize the use of technology to better serve our families. We will also be able to replace an antiquated, paper-intensive process with one that aligns with our green initiatives and reflects our strong commitment to preserving and protecting the environment.”

The solution will dramatically reduce the amount of time the district’s families spend registering their children for school. For example, families that have multiple children enrolled in the district can ‘snap’ data from one child to the next through the use of SmartForm™ technology, which is an intuitive tool built into the solution that will collect relevant data based on previously entered information or choices (grade, activities, medical history, etc.).

“Our high school district has used InfoSnap for several years,” said Steve Cummins, District 97’s senior director of human resources. “By implementing it in our district, we believe we can create a more common, consistent, and convenient registration experience for Oak Park families.” The data submitted by families will be reviewed, polished, and formatted in accordance with the district’s policies and then imported into the district’s PowerSchool student information system.

“As we searched for an online solution provider, one of our main goals was to find one that would complement the features and functionality of our existing systems, most notably PowerSchool,” said Cummins. “After speaking with a number of other districts in the area about their experiences with InfoSnap, we determined it was the solution that would best meet our needs and, more importantly, the needs of our families.”

About InfoSnap:

InfoSnap®, Inc. is the leading provider of cloud-based registration management solutions, including online Application, Admissions, School Choice/Lottery, New Student Enrollment, Annual Student Registration, and Staff Registration, designed specifically for Pre K-12 independent, charter, and public schools. All solutions are backed by dedicated solution specialists, supporting both administrators and families. InfoSnap was founded in 2000 and serves a growing client base of 650+ Pre K-12 clients around the world. For more information, visit InfoSnap.com.
